

NEXT GENERATION CONTROL PANELS

NEW!

LS Alarm Panel

Be ALERTED!

The NEW Davies LS Alarm Panel can be activated using a Float or Level Switch or from a Control Panel input.

Can be supplied with 230V 50/60Hz, 24V DC or 12V DC power

Part No	Power Supply	Light/buzzer	Code
228-LS12-24-230	230V AC/12-24V DC	YES	B
228-LSKIT	230V AC/12-24V DC	YES	B

90DB alarm! with one touch MUTE function

Available as a kitset

The LS Alarm Panel is designed to provide an audio and visual warning alarm when activated by a separate pump control system input.

When the alarm is activated, the Mute button can be pressed once to silence the audio siren and again to turn off the red flashing LED while system is repaired.

The alarm can operate with 12VDC, 24VDC or 230V 50/60Hz power supply. It has a N/O volt free contact which can be used to activate the alarm directly from a float level switch or alarm signal input.

It is supplied in an IP55 enclosure and comes with two cable glands for installing wiring. The Audio siren is 90db at 30cm with rated voltage.

The alarm box can also be supplied as a kit set with 3 pin plug, power lead and 10m change over (NO/NC) float switch to provide tank high or low level warning.
